- Troubleshooting

Getting Started

Repository Registration

Link GitHub repositories to Discord channels using the `!register` command:

```
!register https://github.com/owner/repo #channel @role1 @role2
```

Parameters: - `repo-url`: Full GitHub repository URL - `channel`: Discord channel mention (e.g., `#github-notifications`) - `roles`: Optional role mentions for notifications (e.g., `@contributors @maintainers`)

Example:

```
!register https://github.com/opencodeiita/geekbot #github-notifications @contributors @maintainers
```

Message Format

When an issue is created, the bot sends engaging notifications:

```
Hello Contributors! @contributors @maintainers
```

```
CODE RED - This function just pulled a 'it works on my machine' and now production is crying
```

```
[Rich Embed with Issue Details]
```

Commands

Utility Commands

Command	Description	Usage	Example
<code>!register</code>	Link GitHub repo to Discord channel	<code>!register <repo-url> <channel> [roles...]</code>	<code>!register https://github.com/owner/repo #channel @role</code>
<code>!ping</code>	Check bot latency	<code>!ping</code>	<code>!ping</code>

Command	Description	Usage	Example
<code>!server</code>	Display server information	<code>!server</code>	<code>!server</code>
<code>!user</code>	Display user information	<code>!user</code> <code>[@user]</code>	<code>!user</code> <code>@username</code>

Slash Commands

Command	Description	Usage
<code>/reload</code>	Reload bot commands	<code>/reload</code>
<code>/test-welcome</code>	Test welcome message	<code>/test-welcome</code>

Events and Notifications

Discord Events

Event	Trigger	Action
<code>guildMemberAdd</code>	New member joins	Sends welcome message with server info and role mentions
<code>messageCreate</code>	Message sent	Processes commands like <code>!register</code> , <code>!ping</code> , etc.
<code>interactionCreate</code>	Slash command used	Executes slash commands like <code>/reload</code>

GitHub Webhook Notifications

The bot sends rich Discord notifications for GitHub events:

Issues

- **Opened:** Rich embed with issue details, labels, assignee, and random engaging message
- **Closed:** Notification with closure reason and random message
- **Reopened:** Reopen notification with random message

Pull Requests

- **Opened:** Rich embed with PR details, branch info, and random message
- **Closed:** Notification with merge status and random message
- **Reopened:** Reopen notification with random message

Notification Features

- **Rich Embeds:** Professional formatting with colors, images, and metadata
- **Role Mentions:** Automatic tagging of specified roles
- **Random Messages:** 400+ varied, meme-inspired announcements
- **Color Coding:** Different colors based on issue type and priority
- **Image Support:** Repository avatars and OpenGraph images (for public repos)

Examples

Basic Repository Registration

```
!register https://github.com/microsoft/vscode #dev-channel
```

Registration with Role Mentions

```
!register https://github.com/facebook/react #react-updates @frontend-team @maintainers
```

Multiple Roles

```
!register https://github.com/opencodeiiiita/geekbot #notifications @contributors @core-team @
```

Bot Response Examples

Issue Opened Notification:

```
Hey @contributors!
```

```
BUG HUNT - A wild bug has appeared! Time to channel your inner exterminator...
```

```
**Issue #42: Fix login button styling**  
Opened by @johndoe in opencodeiiiita/geekbot
```

```
Labels: bug, frontend, high-priority  
Assignee: @janedoe  
Points: 5
```

```
[Rich embed with full details]
```

Welcome Message:

```
Welcome @newuser to the server!
```

```
We're excited to have you join our coding community!
```

```
**Getting Started:**  
• Check out #rules for server guidelines  
• Introduce yourself in #introductions
```

****Roles:****

Don't forget to grab your roles in #role-selection!

Enjoy your stay!

Troubleshooting

Bot Not Responding to Commands

1. **Check Bot Status:** Ensure the bot is online in your server
2. **Permissions:** Verify bot has “Send Messages” and “Embed Links” permissions
3. **Channel Access:** Bot must have access to the target channel
4. **Command Format:** Use correct syntax (e.g., `!register url #channel`)

Registration Issues

- **Invalid URL:** Must be a valid GitHub repository URL
- **Channel Not Found:** Use proper channel mention (`#channel-name`)
- **Role Not Found:** Ensure roles exist and are mentionable

Notification Problems

- **No Notifications:** Check if repository is properly registered
- **Missing Mentions:** Verify role IDs are correct in database
- **Image Not Loading:** Private repositories can't load OpenGraph images

Common Commands

Test bot connectivity

`!ping`

Check server info

`!server`

Get user info

`!user @username`

Need help? Check the main README.md for setup instructions or create an issue on GitHub.
